CONSULTANT YEAR-END INDEX

Volume 19, January-December 1979

Index to Major Subjects

Abdominal complaints. See **Gastrointestinal problems.**

Achalasia. See **Puzzling Cases,** Case of achalasia.

Acne, managing. Jillson OF. Aug 32.
- myths and facts. Jelinek JE. May 55.
- treatment, two-drug approach, topical vitamin A acid (retinoic acid) and benzoyl peroxide. Hurwitz S. May 63.

Acute intermittent porphyria. See **Clinical Cases** No. 59, July.

Adenocarcinoma, bowel. See **Puzzling Cases,** Man with abdominal pain.

Adolescents, obese, treating. Rapp CE Jr. Nov 116.
- pelvic exam, first, when and how to do it. Barber HRK. July 33.
- See also **Clinical Cases** No. 54, Feb.

Aircraft, preparing patients for plane trips. Kidera GJ. June 21.
- transporting ill patients by aircraft. Cowan MN. July 67.

Airway obstruction, croup or epiglottitis, differentiating. Menachof LW. March 27.
- wheezing. Dwek JH. Feb 87.

Alcoholism, neurologic and psychiatric effects. Dreyfus PM. May 78.

Allergies, allergic asthma, questions patients most often ask (25). McGovern JP. June 112.
- history and laboratory tests for diagnosis. Smith L. May 71.
- immunotherapy for. Slavin RG. March 117.
- infants, prophylactic measures. Hamburger RN. Oct 23.
- insect-sting allergy, treating. Reisman RE. July 23.
- rash in acute illness, distinguishing mimics from drug rash. Anderson PC. April 23.
- topical medications, allergic reactions. Fisher AA. June 146.

Alport's syndrome. See **Clinical Cases** No. 58, June.

Alzheimer's disease, dementia, understanding. Dreyfus PM. Jan 31.

Anemia, drug-induced acute hemolytic anemia. See **Puzzling Cases,** Case of anemia.
- iron-related: look for more than deficiency. Carmel R. March 135.
- long-standing. See **Puzzling Cases,** Why the long-standing anemia?
- severe, two weeks after birth (erythroblastosis fetalis). Naiman JL, Barness LA. June 125.

Angina, nitrates to relieve symptoms. Bauman D. Aug 57.
- unstable, management. Frank MJ. Jan 117.
- See also **Clinical Cases** No. 56, April.

Angry patients, managing. Lipp MR. Nov 58.

Antibiotics, drug-resistant gram-negative bacteria, questions physicians most often ask (10). Yu VL. May 23.

Antidiuretic hormone excess syndromes, hyponatremia, practical approach to managing. Narins RG. Feb 25.

Appendicitis, appendiceal abscess. See **Puzzling Cases,** Man with abdominal pain.

Arrhythmias, antiarrhythmic therapy, how to select the right method. Brest AN. Jan 23.
- paroxysmal supraventricular tachycardia, treating. Scheinman MM. Oct 194.

Arterial disease. See **Vascular disease.**

Arthritis, gold therapy for, a practical guide. Sack KE. April 55.
- juvenile rheumatoid, diagnosis and treatment. Blau SP. July 74.
- juvenile rheumatoid, predicting outcome. Fink CW. Oct 40.
- polyarthritis, how to select the right tests. Skosey JL. Nov 45.
- Reiter's syndrome, the many faces of. Levine HI. Aug 60.

Ascites, pancreatic. See **Puzzling Cases,** Why the ascites?

Aspiration, tips on management. Lillington GA, Parsons GM. Aug 98.

Asthma, allergic, questions patients most often ask (25). McGovern JP. June 112.

Athletics, joint laxity testing, predicting injuries. Bronson MJ, Scott WN. Jan 145.
- and proteinuria. See **Clinical Cases** No. 61, Sept.
- sports injuries, minimizing the complications. Ferguson AB Jr. Aug 109.

Behçet's syndrome. See **Reiter's syndrome.**

Benzoyl peroxide and vitamin A acid (retinoic acid) for acne. Hurwitz S. May 63.

Blood transfusions. See **Transfusions.**

Breast cancer, mastectomy patients, questions physicians most often ask about managing (10). Plotkin D. March 49.
- screening. Moskowitz M. Sept 47.

Cancer, colon, Hemoccult slides for screening, when and how to use. Anderson PB, Almy TP. Oct 87.
- melanoma, early diagnosis. Sober AJ, Fitzpatrick TB. Sept 80.
- melanoma, invasive, prognosis. Roses DF. Nov 103.

We hope you will take a moment...

... today to share one of your favorite practical pointers with our readers.

If you're concerned about taking valuable time out of an already busy day to draft a carefully worded statement, don't be. Some of our best tips have been hurriedly handwritten on the backs of whatever paper was handy—often a prescription pad.

We award an honorarium of $25 in appreciation of each Tip or Practical Pointer accepted for publication in CONSULTANT. (You will have an opportunity to review the edited copy of your suggestion before it is published.)

Won't you take a moment now to jot down your favorite technique for saving time or effort in diagnosis or treatment?

vitamin and selenium treatment. Sherlock P. May 40.
See also **Breast cancer.**

Carcinoma, basal cell epitheliomas, treatment. Stegman SJ. Jan 92.
squamous cell. See **Puzzling Cases,** Hand full of trouble.

Cardiopulmonary arrest, preventing or managing. Carlson RW, Becker HG. June 58.

Cardiovascular disease, children, evaluating suspected cardiovascular disease. Harned HS Jr. Dec 45.
exercise stress testing, how useful is it? Epstein SE, Borer JS. Sept 61.

Cardiovascular examination, child, evaluating suspected cardiovascular disease. Harned HS Jr. Dec 45.
interpretation. Conn RD. Nov 27.
technique, nine pointers. Bauman DJ. Nov 25.

Carpal tunnel syndrome, what to do when pain signals it. Crane RF Jr, Hay EL. March 81.

Cellular immunity. See **Immune system.**

Chancroid. See **Venereal disease.**

Chemotherapy, antiviral, questions physicians most often ask (10). Phillips CA, Phillips CF. April 93.

Chenodeoxycholic acid ('chenotherapy') and gallstone dissolution. Thistle JL. Nov 69.

'Chenotherapy.' See **Chenodeoxycholic acid.**

Chest pain, acute. See **Clinical Cases** No. 62, Oct.
and esophageal disorders, distinguishing from cardiac disease. Spiro HM. April 29.

Chickenpox, complications, managing. Osborn JE. March 69.

Children, cardiovascular examination for suspected disease. Harned HS Jr. Dec 45.
chickenpox complications, managing. Osborn JE. March 69.
croup or epiglottitis, differentiating. Menachof LW. March 27.
fever in infants and children, evaluation and management. Black SB, Grossman M. Feb 96.
juvenile rheumatoid arthritis, diagnosis and treatment. Blau SP. July 74.
juvenile rheumatoid arthritis, predicting outcome. Fink CW. Oct 40.
short stature, finding the cause. Hendricks SA, Lippe BM. Sept 23.
streptococcal pharyngitis in children, diagnosing with throat cultures. Randolph MF. Feb 153.
See also **Infants' disorders.**

Cholecystitis, with biliary colic. See **Clinical Cases** No. 56, April.

Chromosomal abnormality, E-trisomy syndrome. Aase JM, Yunis JJ. Nov 87.

Chronic obstructive pulmonary disease, home oxygen therapy, which COPD patients will benefit? Speir WA Jr, Harrison GN. March 62.

Cimetidine, ulcer therapy, how cimetidine works. Grollman A. Sept 170.

Clinical Cases:
No. 53, Jan 156. A woman with abdominal pain (pancreatitis secondary to gallbladder disease). Greenburg JL.
No. 54, Feb 139. A teenager with rash and fever (atypical measles). Dorff GJ.
No. 55, March 153. A lump in the neck (benign salivary gland enlargement). Marlowe FI.
No. 56, April 147. A man with 'obvious' angina (cholecystitis with biliary colic). Fisher ML, Baum RA.
No. 57, May 123. The woman whose 'stomach doesn't feel right' (giardiasis). Greenburg JL.
No. 58, June 103. A bricklayer with fever and chills (hereditary nephritis, Alport's syndrome). Argy WP.
No. 59, July 111. A teenager with recurring abdominal pain (acute intermittent porphyria). Deaton J.
No. 60, Aug 125. Why the fatigue, nervousness, and weight loss? (silent thyroiditis). Mazzaferri EL.
No. 61, Sept 125. A 'healthy' young athlete with proteinuria (idiopathic membranous glomerulonephritis). Argy WP.
No. 62, Oct 169. Acute chest pain (sternochondritis). Greenburg JL.
No. 63, Nov 143. A blow to the abdomen (acute hemorrhagic pancreatitis). Diefenbach WCL.
No. 64, Dec 93. The woman who couldn't breathe (myasthenia gravis). Patten BM.

Colic, biliary, cholecystitis with. See **Clinical Cases** No. 56, April.

Colon cancer, Hemoccult slides for screening, when and how to use. Anderson PB, Almy TP. Oct 87.

Coma, assessment and management. Caronna JJ. Jan 175.

Congestive heart failure, questions physicians most often ask about diagnosing (10). Schmidt DD. July 131.

Conjunctivitis. See **Reiter's syndrome.**

Coronary disease, coronary artery spasm, cause of ischemic symptoms. Luchi RJ, Chahine RA. Oct 100.
exercise stress testing, how useful is it? Epstein SE, Borer JS. Sept 61.

Crohn's disease, early clues. Kraft SC. March 165.

Croup, or epiglottitis, differentiating. Menachof LW. March 27.

Cultures, throat, diagnosing streptococcal pharyngitis in children. Randolph MF. Feb 153.

Cutaneous horn. See **Puzzling Cases,** A hand full of trouble.

chest pain and esophageal disorders, distinguishing from cardiac disease. Spiro HM. April 29.
congestive heart failure, questions physicians most often ask about diagnosing (10). Schmidt DD. July 131.

AMOXIL® (amoxicillin)

For complete prescribing information consult Official Package Insert.

Indications: Amoxil® (amoxicillin) is similar to ampicillin in its bactericidal action against susceptible strains of Gram-negative organisms—H. influenzae E. coli P. mirabilis and N. gonorrhoeae, and Gram-positive organisms—Streptococci (including Streptococcus faecalis), D. pneumoniae and non-penicillinase-producing staphylococci. Culture and sensitivity studies should be obtained. Indicated surgical procedures should be performed.

Contraindications: A history of a previous hypersensitivity reaction to any of the penicillins is a contraindication.

Warning: Anaphylaxis may occur, particularly after parenteral administration and especially in patients with an allergic diathesis. Check for a history of allergy to penicillins, cephalosporins or other allergens. If an allergic reaction occurs, discontinue amoxicillin and institute appropriate treatment. Serious anaphylactic reactions require immediate emergency treatment with epinephrine, oxygen, intravenous steroids and airway management.

Usage in Pregnancy: Safety for use in pregnancy is not established.

Precautions: Mycotic or bacterial superinfections may occur. Cases of gonorrhea with a suspected primary lesion of syphilis should have dark-field examinations before receiving treatment. In all other cases where concomitant syphilis is suspected, monthly serological tests should be performed for a minimum of four months. Assess renal, hepatic and hematopoietic functions intermittently during long-term therapy.

Adverse reactions: Untoward reactions include glossitis, nausea, vomiting and diarrhea, skin rashes, urticaria, exfoliative dermatitis, erythema multiforme and anaphylaxis (usually with parenteral administration). Although anemia, thrombocytopenia, thrombocytopenic purpura, eosinophilia, leukopenia, and agranulocytosis have been noted, they are usually reversible and are believed to be hypersensitivity phenomena. Moderate elevations in SGOT have been noted.

Usual Dosage: Adults—250 to 500 mg orally q. 8h (depending on infection site and offending organisms). Children—20-40 mg/kg/day orally q. 8h (depending on infection site and offending organisms). Children over 20 kg should be given adult dose.

Gonorrhea, acute uncomplicated—3 Gms as a single oral dose (see PRECAUTIONS). Serious infections, such as meningitis or septicemia, should be treated with parenteral antibiotics.

Supplied:

Capsules—
250 mg in bottles of 100's and 500's, unit-dose cartons of 100.
500 mg in bottles of 50's and 500's, unit-dose cartons of 100.

for Oral Suspension—
125 mg/5 ml and 250 mg/5 ml in 80 ml, 100 ml and 150 ml bottles.

Pediatric Drops for Oral Suspension—
50 mg/ml in 15 ml bottles with calibrated dropper.

Yunis, Jorge J., E-trisomy syndrome, Nov 87.

ANSWERS TO QUICK QUIZ

These answers reflect the opinions of the authors. The questions appear on page 90.

1. Donovan bodies in stained smear

2. Toxoplasmosis

See **Finding the cause of lymph node enlargement**

3. None. They are all characteristic of innocent murmurs.

See **Evaluating a child with suspected cardiovascular disease**

4. Tympanometry. This diagnostic method involves the use of a new instrument—the electroacoustic impedance bridge.

See **Otitis Media: newer aspects of etiology, pathogenesis, diagnosis, and treatment**

5. 7 to 7.9 mg/dl. By the time serum uric acid levels reach 9 mg/dl, there is a 90% incidence of gout and a 40% incidence of uricolithiasis.

6. Allopurinol and probenecid. These uric acid-lowering agents may intensify the attack.

See **Hyperuricemia—what to do about it**
